

## CLEAN ENERGY ACTION PLAN

The COUNTY/TOWN of \_\_\_\_\_ adopts the following set of goals for 2005:

1. To continue to participate in the Clean Energy Leadership Task Force's quarterly meetings to continue being informed about clean energy technologies and financial incentives available to municipalities.
2. To create an internal energy task force, or assign a commissioner to collect data and analyze the possibilities, within a given timeline for action.
3. To identify municipal facilities to target for energy audits.
4. To meet with LIPA and discuss their commercial construction program for building retrofits.
5. To meet with NYPA and discuss their financing program for building retrofits.
6. To select a priority energy efficiency project involving one major facility which incorporates a comprehensive set of clean energy technologies. *(For example, retrofitting the Town Hall with energy efficient lighting fixtures and windows, a geothermal heating and cooling system, etc.)*
7. To adopt one (or a few) easily implemented technologies across many facilities. *(For example, changing "exit" light fixtures to energy efficient LED light bulbs in several municipal buildings.)*
8. To create a policy to phase in alternative fuel (e.g. natural gas, biodiesel, etc.) and/or hybrid vehicles into the the municipal vehicle fleet.
9. To evaluate which municipal facility might be best suited for an installation of solar panels and prepare applications for funding of a solar project.
10. To pass an Executive Order making energy efficient workplace practices a mandate. This would include motion sensors, turning off computers at night, etc.
11. To adopt a policy of purchasing Energy Star rated office equipment.
12. To pass an Executive Order mandating green building practices for all new construction and major renovations.
13. To purchase "green power" through the GREEN CHOICES program.
